

## BOX TABLE

Our Box Table is a dining table built like a desk. A dining table is never just a place to eat dinner with guests. It is where homework happens, bills are paid, business plans are written and yes where wine is drunk late into the night with friends. Dining tables are multi-purpose surfaces in most homes. The Box takes this one step further by offering a space for everyone to stash their stuff at the table. A communal work and play surface perfect to share ideas, play a game, craft a project or eat a meal.

Available in 4 sizes to accommodate a range of uses from dining table to executive desk or group work station.

Use it as a desk. Use it as a table. Use it as BOTH. The two level surface makes switching between activities easy. The center of the Box Table has deep storage accessible from all sides and can be used for supplies, laptops, tablets, cords, games, condiments, whatever is used or shared at a table. A multi-purpose live-work-play dining table.
